(54) Title: GROWTH OF FOREIGN CELLS IN FETAL ANIMALS FACILITATED BY CONDITIONAL AND SELECTIVE DE-
STRUCTION OF NATIVE HOST CELLS

(57) Abstract: Foreign cells can be grown in fetal non-mammalian hosts for the production of transplant organs and tissues, the
development of new therapeutic agents, and the production of biological factors and drugs. Tissue-specific injury to fetal host target
cells is carried without substantial injury to the maternal host or foreign cells, providing an environment in which the injured tissue
can be regenerated with the foreign cells.
